SOFTWARE EXPERIENCE

Experienced in software design and development for business solutions.

As a Computer Engineer with experience in multiple environments, I can design and develop programs using the latest and most appropriate technology.

Key skills include:

- Languages: Net, SQL, Android
- Applications: MS Visual Studio, VS Code
- Application servers: IIS
- Libs: Npm, Nuget
- Web : React.Js, Ajax, SCSS, ASP.NET MVC, ASP.NET Core MVC
- Database systems: SQL Server, MySQL, NoSQL(MongoDB, Google Firebase)
- Frameworks: Entity Framework

PROFESSIONAL EXPERIENCE

RetailMarkup Bilişim Hizmetleri, Mecidiyeköy/İstanbul

Backend Developer (01.2020 — now)

Using asp.net MVC, we implemented the program called SekizKol OMS(Order Management System). In this system, I designed two separate interfaces for user and admin. In this project, I developed my JS and CSS skills. I developed a financial report tool for a textile company. I am currently working in two different projects in our company, firstly, we are developing the system we currently use to work with react.js and web api, and the other project is developing a kind of automation system with asp.net core.

Akare Bilişim, Avcılar/İstanbul

Stajyer Mühendis (06.2018 — 08.2018)

I have developed an Android application that can be used by job security experts using the Rest api over .net.

İstanbul Bakırköy Bölgesi Kamu Hastaneleri Birliği Genel Sek, Bakırköy/İstanbul

Test Operatörü (09.2013 — 06.2014)

hospital management information systems were being developed for 8 hospitals. My job was to test the screens.

Probim Bilişim, Bakırköy/İstanbul

Teknik Destek Elemanı (07.2013—08.2013)

I worked in the repair and optimization of computers at Carrefour and Kuveyt Türk Participation Bank.

PROJECTS

1. SekizKol Oms (Order Management System) We have distributed the workload to the stores by opening the store repositories to e commerce without the need for the e-commerce store. (Asp.net MVC, Wep Api, Bootstrap)
1. SekizKol Oms (Order Management System) We have distributed the workload to the stores by opening the store repositories to e commerce without the need for the e-commerce store. (Asp.net MVC, Wep Api, Bootstrap)
2. I have developed an automation running on android that enables occupational safety experts to upload data in the field and automatically transfer data to the system when there is internet. (Rest API, Retrofit, Android, Web API)
3. "Plagiarism system" that finds out whether the image files used in theses and presentations are stolen. (Java, Python)
4. I designed an MVC-based Management Panel for a company that needs warehouse tracking for shipment control. I created the interface with Bootstrap libraries.
5. On the backend side, I implemented a "Personnel tracking" system using Angular 7 on the Web API Frontend.
6. I implemented a STUDENT INFORMATION SYSTEM running on ASP.net MVC.
7. Cargo Tracking Automation (JSF, PrimerFaces, MYSQL) "tracks the process from receiving a cargo to delivering it."
8. Attendance System with QR code (Android, Firebase) "enables the attendance of students with QR code without the need for signature"
9. Mobile English Turkish Dictionary (Android) "contains about 3000 words"
10. Store Sales Stock Automation (Java SE, MYSQL) "Automated system that calculates inventory tracking, sales management and statistics in the store or store."
11. English Education Application (Android) "It shows 3000 words and the sentence containing the words as an example."
12. Fault Tracking Automation (C #, MSSQL) "The system in which the fault tracking of computers and derivative devices in the institution is made"
13. IP Radio Application (Android)
<https://play.google.com/store/apps/details?id=com.gamadeveleop.radyodinle> HYPERLINK
["https://play.google.com/store/apps/details?id=com.gamadeveleop.radyodinle&hl=tr"&](https://play.google.com/store/apps/details?id=com.gamadeveleop.radyodinle&hl=tr)
